

**Sure-Fire Ways to get on Great with Horses:**

Pet on your horse

Spend quality time with him, both before riding and after

Find 'the spot' where he loves to be scratched. Let him tell you where that is!

Make sure he is thoroughly prepared for whatever you plan to do

Allow more 'soak' time during 'training'

Ride on a loose rein often

*Never* betray him by doing any of the things listed on the previous page!!

Focus on 'Riding with Quality', not "Training the Horse"

Hack out more and drill less

Take notice of what he's trying to 'tell' you

Encourage him to feel like he can take *all his troubles* to you

Never blame him, keep working on yourself!
