

Angela Fergusson and 'Monique III'

Grand Prix Dressage Horse of the Year 2008

Riding Monique used to be quite an affair as she was a 'super spook', some days if she was feeling insecure we could only do half the arena as the gremlins at the top end were just far too scary, this as you could imagine made our training rather difficult at times. Hacking out was a complete no no, she would be absolutely terrified of everything, so unfortunately not much of this was done. I saw the products Alleviate C and Tox-Defy at Sue Lucas Saddlery, and thought well it was worth a try I had nothing to lose.

I remember sending Jenny an email about two weeks later exclaiming my utter astonishment in my mare's behavior, I could finally ride full arena, was this just a coincidence or was there something more?? Well I can confirm that I have been riding full arena, past all the terrifying gremlins, and out hacking now for over a year, Monique is settled and happier than she has ever been. We enjoy hacking at least twice a week and training has become so much more pleasant!

My sincere thanks to Jenny for her fantastic products that really have worked for Monique and I.
